

Daniel Stern

Fine Art Sculptures

Daniel Stern works in his studio which is filled with many of his detailed sculptures

Daniel Stern has enjoyed a lengthy and successful theater, film, and television career as an actor, writer and director, and is the archetypal storyteller in all of his artistic endeavors. He is known for his roles in the films *Breaking Away*, *Diner*, *City Slickers*, the *Home Alone* films, and as the narrator for the television series *The Wonder Years*.

These days Daniel devotes much of his creative energy to sculpting in his Culver City studio. Self-taught, Daniel has now gone on to master the complicated and complex process of bronze sculpting. Most recently, Daniel secured three high-profile public placements: San Diego Urban Trees, Pasadena Public Art and the Palm Desert El Paseo exhibition with his "Handstand" bronze.
